Forecast for Friday 13 Oct 2023

Weather: Cloudy overnight and into the morning, perhaps a little light rain for a time though mostly remaining out in the Irish Sea. The cloud thinning and breaking in the morning then some sunny spells, just a low risk of a passing light shower, though if one occurs later in the day it may be cold enough for it to be sleety on the summits.

Chance of cloud-free hill tops above 700m: 50% for a short time overnight then 90% or more by day

Low cloud and visibility: Cloud lowering to 750m, possibly lower for a time overnight then breaking and lifting in the morning. Away from any summit hill fog in early hours, visibility will be good.
